natural bamboo plank for furniture and decorative material

Natural color which not mean bamboo origin color , here natural color mean the bamboo strand under high temperature steamed and boil down and bleached /whiten and come in to clear light white or light beige color. So to keep the color concordant without any color difference and stain.

Another reason for bamboo strand /strip need to be boil down under high temperature is because the origin bamboo has high water moisture and sugar and other kinds of chemical composition , all these composition will easy cause woodworm, enzyme, out of shape etc..so to avoid these problem, after steamed and boil , all the bamboo panel will be the most health, most ECO-friendly, most safe materials for furniture and door and flooring etc. Interior home using.

All the bamboo with structure of horizontal or vertical or cross, the color can be nature (light beige) color.

Bamboo Panels normal size :

Regular length of 1000mm、 2000mm、 2200mm、 2500mm
Super length of 3000mm , 3050mm to 4050mm.
And width 5mm to 1250mm.
Thickness 1.5mm to 450mm.

And natural color cost is higher than carbonized color, people will ask why, the reason is natural color has higher requirements on bamboo strip/strand choosing, which cause the raw strand using rate is not as high as carbonized color.

PX bamboo Industry mainly take mao bamboo above advantages, use its raw bamboo strand to produce to solid bamboo panels, solid bamboo plywood, solid bamboo planks, which is very ideal material for Furniture, kitchen crafts, door, bathroom Crafts, Kitchen counter top and office table top etc. The crafts made from bamboo panels looks very elegant, clean and green . Which is become more and more hot and popular in modern people's life.
